Projects

Video Subtitler :

- Developed a Gemini CLI tool that generates syllable-accurate English VTT subtitles using parallel processing.
- Implemented stream chunking with codec-aware overlap context to prevent API payload limits and preserve boundary continuity across clips.
- Built automated timestamp stitching with cue-overlap healing and a secondary global LLM pass for full-script context, grammar, and character refinement.

OpenCode Agent Plugins :

- `opencode-websearch-addons`: Grounded web search using direct Google Gemini and OpenAI API integrations, with provider fallback.
- `opencode2-goal-plugin`: Persistent goals, progress tracking, evidence capture, and auto-continuation.

Pi Extensions :

- `bwrap-sandbox`: Added a Bubblewrap security boundary and approval gate for Bash and file tools.
- `websearch`: Added grounded web search with citations and provider fallback.
- Built custom subagents with specialized capabilities, isolated tool access, and agent rules for autonomous task orchestration.

Experience

MULTIWAYS :

Android Developer | Nov 2023 - Oct 2025

- Brought up the Daria Bond device for Android 14 and Android 15.
- Triaged and resolved user-reported bugs.
- Resolved xTS test failures for Android 14 and Android 15 releases.
- Fixed Android framework bugs.

PearTree :

Android Developer | Aug 2023 - Oct 2023

- Ported ParallelSpace functionality to GrapheneOS.
- Researched per-app VM isolation using `crosvm` on Google Pixel devices.

Murena :

Android Embedded Engineer | Oct 2022 - Apr 2023

- Upgraded Pixel 4, 4 XL, and 5 devices to Android 12, maintained Samsung S8 and S9 device trees, and authored test cases.

Teracube :

AOSP Development SDE Intern | Jun 2022 - Sep 2022

- Brought up the Teracube 2e device to Android 12 and maintained LineageOS device trees.

AOSPA (Paranoid Android) :

Software Engineering Lead | Nov 2020 - Present

- Maintain Qualcomm framework additions, review and merge upstream AOSP branches, and support Nothing Phone (2) and POCO F5 on CLO, Qualcomm's fork of AOSP.
- Contribute regularly to LineageOS.

Skills

- **DevOps:** CI/CD automation, release workflows, containers, and build systems.
- **AI Agent Tooling:** Agent plugins, tool orchestration, sandboxing, and workflow automation.
- **AOSP:** Platform bring-up, framework debugging, and device trees.

- **Linux Systems & Administration:** System administration and desktop environment configuration using Bash scripting, systemd service management, package managers, security hardening, diagnostic troubleshooting, and an understanding of Wayland protocols and freedesktop standards.
