Projects

Video Subtitler :

- High-performance Gemini CLI generating syllable-accurate English VTT subtitles via parallel processing.
- Implemented stream-chunking with codec-aware overlap context to bypass API payload limits and preserve boundary continuity across clips.
- Built automated timestamp stitching with cue-overlap healing and a secondary global LLM pass for full-script context, grammar, and character refinement.

OpenCode Agent Plugins :

- `opencode-websearch-addons`: Grounded web search via native Google Gemini and OpenAI implementations, with provider fallback.
- `opencode2-goal-plugin`: Persistent goals, progress tracking, evidence capture, and auto-continuation.

Pi Extensions :

- `bwrap-sandbox`: Added a Bubblewrap security boundary and approval gate for Bash and file tools.
- `websearch`: Added grounded web search with citations and provider fallback.
- Built custom subagents with specialized capabilities, isolated tool access, and agent rules for autonomous task orchestration.

Experience

MULTIWAYS :

Android Developer | Nov 2023 - Oct 2025

- Brought up Daria Bond for Android 14 and Android 15.
- Resolved user-reported bugs as needed.
- Fixed xTS issues for Android 14 and Android 15 releases.
- Fixed Android framework-related bugs.

PearTree :

Android Developer | Aug 2023 - Oct 2023

- Ported ParallelSpace functionality to GrapheneOS.
- Researched per-app VM isolation using `crosvm` on Google Pixel devices.

Murena :

Android Embedded Engineer | Oct 2022 - Apr 2023

- Upgraded Pixel 4 / 4 XL / 5 to Android 12, maintained Samsung S8 / S9 device trees, and authored comprehensive test cases.

Teracube :

AOSP Development SDE Intern | Jun 2022 - Sep 2022

- Brought up Teracube 2e to Android 12 and maintained LineageOS device trees.

AOSPA (Paranoid Android) :

Software Engineering Lead | Nov 2020 - Present

- Maintain Qualcomm framework additions, review and merge upstream AOSP branches, and maintain Nothing Phone (2) and POCO F5 on CLO AOSP.
- Frequent contributor to LineageOS.

Skills

- **DevOps:** CI/CD automation, release workflows, containers, and build systems.
- **AI Agent Tooling:** Agent plugins, tool orchestration, sandboxing, and workflow automation.
- **AOSP:** Platform bring-up, framework debugging, and device trees.
- **Linux Systems & Administration:** Comprehensive Linux desktop and system administration experience: Git, Bash, package managers, XDG/Wayland, systemd, security, and troubleshooting.
